

# A program For Photographers Event

## Data Description

The data used in this project is provided by Foursquare location data. The data are grouped by landscape area, and each area included the information about this area and all information about restaurants, cafes, and stores which in this area.

Thus features like address of location can be extracted and then can be taken into consideration as more the features falls into particular location, more will the chance of that location to be selected.

```
Dataset is obtained from: 'https://api.foursquare.com/v2/venues/search?client_id={}&client_secret={}&ll={},{}&v={}&query={}&radius={}&limit={}'
```
